

POWERZONE SERIES

POWERZONE 100

INSTRUCTIONS OPERATING

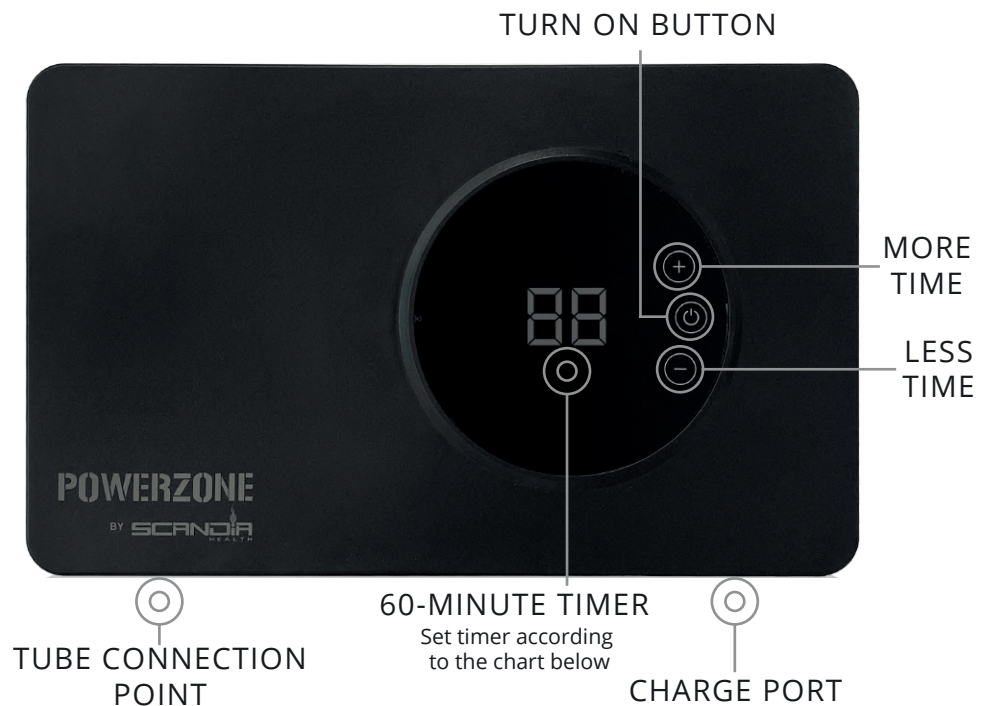

AM~FINN

DESCRIPTION

Welcome the power of ozone, and the PowerZone Series the world's first automatic sanitization system. Designed specifically to remedy the ongoing sanitary concerns of commercial and residential saunas and steam rooms, the PowerZone 100 leverages the principles of corona discharge to make sanitization easier than you ever could have imagined for ANY room.

INSTRUCTIONS

1. Plug unit into standard 110v outlet.
2. For In-room sterilization: place the system in room and set timer using (+/-) according to chart below.
3. Clear room of all people/pets and close the door.
4. Re-enter the room 10-60 minutes after cycle has completed. Unit will automatically turn off once timer runs out.

ROOMS/TIME

Room Size	Run Time	O3 Dissipation Time
500 - 1000 cu ft	60 min	15 min
400 - 500 cu ft	45 min	15 min
200 - 400 cu ft	30 min	10 min
100 - 200 cu ft	20 min	10 min
Up to 100 cu ft	10 min	10 min

IMPORTANT PRECAUTION

While Ozone is a highly effective sterilizer it is known to cause respiratory agitation. People and pets should not enter a room until 10 to 15 minutes after the Powerzone cycle has finished.
